NAME	**DONYL CYPRUS R. BASIO**
PROJECT TITLE	**TechNova: An IT Solutions and Compliance Management System**
SUBJECT: CODE: TIME:	IT15/L Integrative Programming and Technologies 8441 10:00 am - 12:00 nn
TOPIC (Type of Business Process)	#26 Compliance Management Systems
Products/Services	Small IT Consulting and Software Services Company
Agile Model - SDLC	**REQUIREMENTS AND PLANNING** The proposed system is designed to support TechNova IT Solutions, a small-sized IT company, in managing company policies, monitoring employee and supplier compliance, and handling procurement and supplier information through a centralized web-based platform. The system will allow administrators to manage user accounts, roles, and basic department groupings, while enabling authorized personnel to upload, assign, and monitor company policies. Procurement activities will be recorded and linked to suppliers and relevant policies to ensure that purchases follow organizational standards. Employees will be able to view assigned policies and acknowledge compliance, while supplier-related policies will ensure that vendors adhere to company requirements. The system will also automatically record audit logs and generate compliance and procurement reports to support transparency and accountability within the organization. The system is designed with scalability in mind, allowing it to adapt to medium-sized organizational structures in the future. To ensure successful development within one academic term, the project will follow a modular development approach, allowing each system component user management, policy management, compliance monitoring, supplier management, procurement management, and reporting to be developed and tested independently. The system will be built using ASP.NET Core for the backend, SQL Server for data storage, and standard web technologies for the user interface due to their reliability, security features, and suitability for web-based organizational systems. Careful planning, a clearly defined scope, and the use of familiar technologies will help minimize technical risks and ensure that the system meets both functional and non-functional requirements efficiently.

TechNova: An IT Solutions and Compliance Management System

Users table

Field Names	Datatype	Length	Description
userID-PK	Int-AI	9	User's ID Number
firstname	Text	50	User's First Name
lastname	Text	50	User's Last Name
email	Text	25	User's Name or email
password	Text	25	User's Password
role	Text	25	User's Role/Function
departmentID	Int	9	User's Department
status	Text	25	User's

Policies table

Field Names	Datatype	Length	Description
policyID-PK	Int-AI	9	Policy ID
policy_title	Text	100	Policy Title
description	Text	225	Policy Description
category	Text	50	Policy Category
file_path	Text	150	Policy File Location
status	Text	25	Policy Status
uploaded_by-FK	Int	9	User ID
date_uploaded	Date	-	Date Uploaded

Policy Assignments table

Field Names	Datatype	Length	Description
assignmentID-PK	Int-AI	9	Assignment ID

policyID-FK	Int	9	Policy ID
userID-FK	Int	9	User ID
assigned_date	Date	-	Date Assigned

Compliance Status table

Field Names	Datatype	Length	Description
complinaceID-PK	Int-AI	9	Compliance ID
assignmentID-FK	Int	9	Assignment ID
status	Text	25	Compliance Status
acknowledged_date	Date	-	Date Acknowledged

Suppliers table

Field Names	Datatype	Length	Description
supplierID-PK	Int-AI	9	Supplier ID
supplier_name	Text	100	Supplier Name
contact_person_fname	Text	50	Contact First Name
contact_person_lname	Text	50	Contact Last Name
contact_person_number	Text	25	Contact Number
email	Text	50	Supplier Email
address	Text	150	Supplier Address
status	Text	25	Supplier Status

Procurement table

Field Names	Datatype	Length	Description
procurementID-PK	Int-AI	9	Procurement ID
item_name	Text	100	Item Name
category	Text	50	Item Category
quantity	Text	9	Quantity
supplierID-FK	Int	9	Supplier ID
related_policyID-FK	Int	9	Policy ID
approval_status	Text	25	Procurement Approval Status
purchase_date	Text	-	Purchase Date

Suppliers Policy table

Field Names	Datatype	Length	Description
supplier_policyID-PK	Int-AI	9	Supplier Policy ID
supplierID-FK	Int	9	Supplier ID
policyID-FK	Int	9	Policy ID

assigned_date	Date	-	Date Assigned
compliance_status	Text	25	Compliance Status

Audit Logs table

Field Names	Datatype	Length	Description
logID-PK	Int-AI	9	Log ID
userID-FK	Int	9	User ID
action	Text	100	Action Performed
module	Text	50	Module Name
logdate	DateTime	-	Date & Time Logged

Departments table

Field Names	Datatype	Length	Description
departmentID-PK	Int-AI	9	Department ID
department_name	Text	50	Department Name
